

PFAS UPDATE: STATE-BY-STATE CONSUMER PRODUCTS REGULATIONS, JULY 2023

Jul 18, 2023

This blog was originally published in July 2023. [Visit our most up-to-date blog on state-by-state regulations for PFAS in consumer products >](#)

Manufacturers, distributors, and retailers of consumer products across a broad spectrum of industries are being impacted by regulations regarding the presence of per- and polyfluoroalkyl substances (“PFAS”) in their products. This area is rapidly developing as states create new laws, and the penalties and litigation risk for non-compliance can be significant.

PFAS BACKGROUND

PFAS is a family of chemicals comprised of somewhere between 5,000-12,000 compounds depending on the regulatory definition. According to the [Agency for Toxic Substances and Disease Registry](#) (“ATSDR”), PFAS have been reported in certain consumer products, including the following:

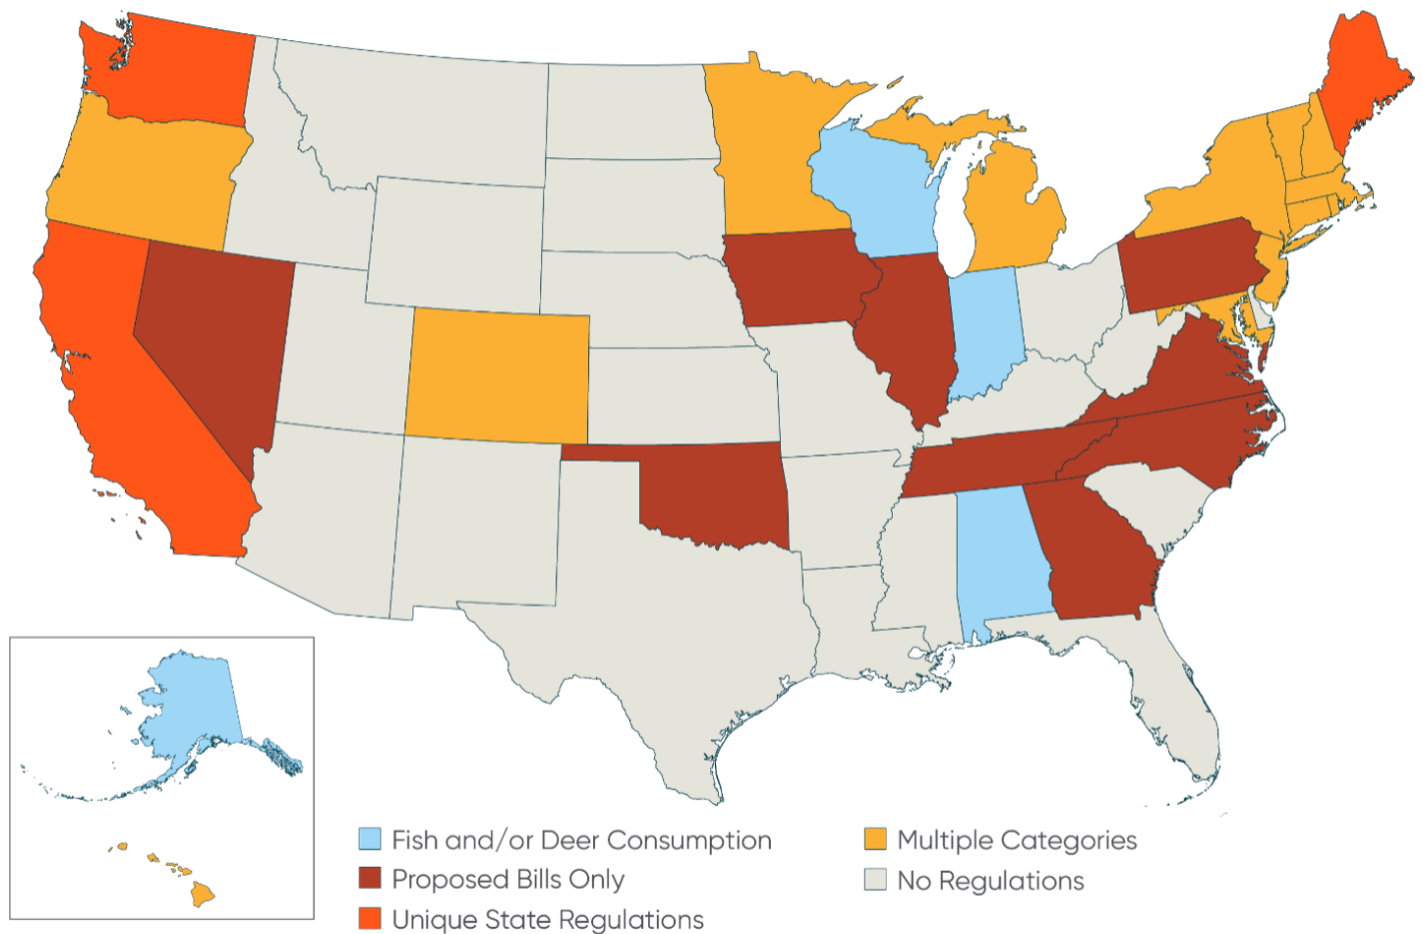

- “Some grease-resistant paper, fast food containers, microwave popcorn bags, pizza boxes, and candy wrappers;
- Stain resistant coatings used on carpets, upholstery, and other fabrics;
- Water resistant clothing;
- Cleaning products;
- Personal care products (shampoo, dental floss) and cosmetics (nail polish, eye makeup); and
- Paints, varnishes or sealants.”

Some sources, including EPA, also report that certain PFAS chemicals accumulate both in the human body and animals after ingestion through water and food. Accordingly, some states have enacted health advisories limiting the consumption of animal meat and fish tissue.

SPECIFIC CONSUMER PRODUCT REGULATIONS

The map below is an overview of enacted and proposed state laws and regulations as of **July 12, 2023**, to assist you in investigating whether your products may be impacted.

ENACTED AND PROPOSED PFAS CONSUMER PRODUCT REGULATIONS

As of July 13, 2023

The following drop down boxes identify the specific product categories each state regulates, but does not include the specific regulatory levels or requirements to avoid confusion because the structure and limits vary widely from state to state.

ALABAMA

No PFAS consumer product regulations (as of the date of publication): Arizona, Arkansas, Delaware, Florida, Idaho, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Montana, Nebraska, New Mexico, North Dakota, Ohio, South Carolina, South Dakota, Texas, Utah, West Virginia, and Wyoming.

CONCLUSION

While several states do not currently have any adopted laws or regulations with respect to PFAS in consumer products, many are considering ways to address these chemicals. In addition, while most states have regulated the inclusion of PFAS in specific product categories, Maine and Minnesota have passed sweeping laws that require the disclosure and eventual removal of intentionally added PFAS in all products, including industrial and commercial products. The regulation of these chemicals in consumer products will continue at the state level, and possibly at the federal level as well, so now is a critical time for businesses to determine whether any of their products or production methods contain or use these chemicals.

For more information on PFAS chemicals, and the regulatory and litigation risks that they pose, please visit our [PFAS webpage](#). If you believe that you may be impacted by an enacted or proposed regulations, or if you would like help with evaluating whether PFAS may be present in your products, please contact Tom Lee, John Kindschuh, Emma Cormier, or any other member of our PFAS team at Bryan Cave Leighton Paisner LLP.
