## **BCLP PARTNER IN 'LEGALTECH NEWS' ON PREDICTIONS FOR CYBERSECURITY IN 2022**

Jan 07, 2022

BCLP Partner Christian Auty was quoted Dec. 30 by *Legaltech News* in the second of the seven-part series on legal tech's predictions for cybersecurity for 2022. "GDPR has required the creation of a data inventory or a data map since 2018 for both controllers and processors subject to the Regulation, but this has not been a requirement in the United States to date. That is about to change," Christian said. "Specifically, three laws taking effect in 2023 (the Virginia, Colorado, and new California privacy laws) all have a 'data minimization' requirement, meaning that companies are obligated to locate and delete personal data they no longer need."
