

ARTIFICIAL INTELLIGENCE

Businesses across the globe and in all industry sectors, are being rapidly transformed by artificial intelligence (AI), machine learning and data-driven technologies. While recognizing the transformative power of these technologies, there are potentially significant reputational, regulatory, security, and legal risks to be managed.

WHAT SETS US APART

BCLP provides sophisticated and innovative advice that your business needs in order to embrace AI technological transformation. We will help you address these emerging and constantly evolving challenges offering a pragmatic and comprehensive approach.

Drawing from a multi-disciplinary global team we advise clients on the 'best in class' commercial AI solutions to give our clients a competitive edge. We assess the legal risks and regulatory implications of these complex, cutting-edge technologies so that your business stays ahead of the technological curve.

We track the fast-moving global regulatory landscape with our horizon scanning tools to keep internal teams and clients ahead of the AI regulatory curve. Companies that develop AI tools or procure AI tools to integrate into their products, services and processes need to anticipate, understand and comply with the various legal frameworks and standards around the world and the intricacies that come with them.

BCLP's AI experts can help your organization address the full scope of complex IP, licensing, privacy, security, and other legal issues as they emerge in this rapidly changing landscape.

As the regulatory framework for AI tools evolves at pace globally, we are in constant dialogue with our clients to understand how we can best assist them. BCLP is investing in AI that augments, rather than replaces our lawyers. We are finding strategic ways to employ AI to maximize benefit for our clients.

HOW COMPANIES CAN GET AHEAD

Companies that develop AI tools or procure AI tools to integrate into their products, services and processes need to anticipate, understand and comply with the various legal frameworks and standards around the world and the intricacies that come with them.

THE EU ARTIFICIAL INTELLIGENCE ACT

The EU Artificial Intelligence Act is representative of the new AI legislation that businesses need to plan for. It requires that providers and deployers of AI systems have a sufficient level of AI literacy among staff dealing with the operation and use of AI systems. We will help you navigate those specific challenges, and guide you on the implementation that came into force February 2025.

TECHNOLOGY TRANSACTIONS AND CONTRACTING FOR AI

We have a proven track record of helping our clients navigate the ever-evolving challenges of sourcing, developing, and commercializing artificial intelligence and machine learning (AI/ML) technologies. For more than a decade, our cross-sector, multi-disciplinary teams have delivered deep experience, advising clients on cutting-edge AI/ML issues in a wide variety of transactions. From digital transformation projects to the sourcing and adoption of AI/ML platforms, we have assisted our clients with complex AI/ML issues in vendor and sourcing transactions, adoption and implementation projects, M&A and private equity transactions, financings and public offerings, joint ventures and technology developments, and large-scale I/ML commercialization initiatives.

For our team, every client is increasingly an “AI client”, as adoption and dependency on AI/ML technologies continues to grow. However, we understand that this is not a one-size-fits-all environment and successfully leveraging AI/ML starts with understanding your business. Our mission is to partner with you to harness the rapidly evolving advantages of AI/ML by delivering collaborate, practical, cost-effective approaches, tailored to achieving your business objectives.

Our tech transactions team is underpinned by a multi-disciplinary team of technology, data privacy/security, and intellectual property lawyers. We bring extensive AI/ML sector knowledge enabling us to understand the rapidly-changing regulatory and business environment in which AI/ML operates. Leveraging this team approach enables us to support you in navigating the significant change and disruption that can come with the adoption of AI/ML technologies.

Operating as one global firm, we collaborate seamlessly as cross-border teams to support your business objectives. Our team is renowned for our ability to collaborate effectively with client teams across the world and work proactively to negotiate and close deals. Our hands-on approach provides us valuable insights into the critical elements driving the success of your AI/ML project and enables us to deliver agile, tailored solutions that achieve our clients' long-term business objectives, even against the backdrop of dynamic, rapidly-evolving market demands - where timelines, priorities and objectives change quickly.

AI AND ENERGY

Recognising the key importance of energy procurement to support data centres in the digital economy as jurisdictions look to incentivize AI investment and the digital infrastructure underpinning successful implementation of AI solutions, BCLP's Data Center & Digital Infrastructure Team has the vision and experience to anticipate evolving trends and provide the strategic insights and sophisticated advice for investors, developers, operators, and users participating in the data center and digital infrastructure realm.

BCLP'S INNOVATION AGENDA

BCLP has been recognized for its innovation in the AI legal tech sector, launching a GenAI lease reporting tool with proptech innovator Orbital Witness (FLARE, our **F**ast **L**ease **A**ssisted **R**eporting tool) to support more efficient document review and data extraction. BCLP's solution embodies our shared vision of AI purpose-built for real estate, with wide-ranging functionality to improve real estate document review, including automatically generating first drafts of lease reports, quickly visualising complicated lease hierarchies and the ability to "ask anything" of any real estate document.

Our innovative partnering strategy approach to develop FLARE allows us to use the Orbital Copilot AI engine to produce a bespoke BCLP report, honed to build upon the years of knowledge management development around lease reporting at BCLP

AI AWARDS

- BCLP honored with two awards at The Professional Services Management Excellence Awards 2025
- BCLP FLARE shortlisted for the ALM Legal Innovation Awards for Outstanding Collaboration 2024
- BCLP FLARE shortlisted for Property Week Proptech Innovator of the Year 2024
- BCLP Flare shortlisted for the Legal Business Awards Legal Technology Team of the Year 2024
- BCLP Named Recipient of the 2024 American Legal Technology Award
