### **Environmental Justice Revisited**

Since January 20, 2025, the Trump Administration has implemented numerous changes to federal environmental justice (“EJ”) initiatives which are expected to result in reduced permitting and regulatory burdens. While the current administration may continue to make changes to EJ policies on a federal level, it is important to know that many states still have their own EJ policies that remain enforceable. This insight discusses the following three things: provides the necessary historical context regarding EJ; outlines the recent actions by the Trump Administration; and explores some state regulations and potential ramifications for your business. It is vital for your business to stay current with these developments and to consult with legal counsel before making any changes to your operations based on the current administration's actions.

### **HFC Regulation: Navigating Impacts to a Fast-Growing “Climate Control” Industry**

Climate control technology is increasingly a focal part of modern society's expectation to have sophisticated supply chains, particularly relating to perishable items such as pharmaceuticals, raw products, and food. The United States federal government and state governments have been actively working to regulate hydrofluorocarbons (HFCs), which are critical to refrigeration and the quickly evolving supply chain. This article provides a survey of United States legal obligations that may impact everyday business decisions regarding the production, use, and transport of HFCs, and what industries may expect as the regulations continue to develop and take force.
