Biography

Aadam is a technology lawyer who specialises in advising on complex commercial and technology transactions, strategic collaborations and cross-border deals for clients across the United States, Europe and the Middle East.

Aadam has particular experience advising on technology-rich and data-driven transactions including technology licensing and supply agreements, SaaS and cloud services arrangements, digital transformation and outsourcing projects and on the procurement and development of emerging technologies including artificial intelligence (AI) and connected (IoT) systems.

With experience supporting on mergers and acquisitions, Aadam regularly advises clients on the technology, intellectual property and data privacy aspects of acquisitions, and has negotiated carve-outs and transitional services arrangements.

Aadam has experience acting for clients across a range of sectors, including technology and software, financial services, telecoms, healthcare, energy, pharmaceuticals, digital assets, real estate and industrials, and aviation. Prior to joining BCLP, he completed client secondments with leading organisations in the media and energy sectors.

Aadam has frequently published thought leadership discussing the development of the UK and EU AI regulatory landscape and authored an article on the use of industrial data and compliance with the EU's Data Act in *Law360*.
