BCLP has been established in the Middle East since 2009, although many of our lawyers have worked in the MEA (Middle East and Africa) region for longer. We are embedded in the local markets by having a genuine on-the-ground local law capability, serving both domestic and international clients. We have an office in Abu Dhabi (ADGM Square) as well as in Dubai (DIFC) and run them as one offering. From these two hubs, our growing team - currently of six partners and 19 lawyers in total - undertake high profile and significant mandates across the Middle East region and Africa on local projects and operations, and on making investments across Europe, USA, Southeast Asia and India. Whether it's a high-value engineering arbitration, assisting in drafting zoning and sustainability laws or free-zone regulations, structuring and planning a giga-project, forming a joint venture or handling any type of transaction in the real estate and infrastructure sectors, our team has the experience and practical knowledge to help you achieve your objectives throughout the region.

EXPERIENCE

We have supported clients such as Abu Dhabi Ports Company, Al Tayer Group, ALEC Engineering & Contracting LLC, DAMAC, Dubai Holding, Dubai Multi Commodities Centre, GS E&C, Hyundai C&E, Majid Al Futtaim, Miral, Samsung Engineering, Tamouh Investments, and many others.

The legal disciplines that our UAE offices cover include:

- Real Estate and Infrastructure
- Construction, Engineering and Procurement
- Real Estate Finance
- Corporate and Commercial
- Hotels and Leisure

- Dispute Resolution
- Planning and Environment
- Projects

How UAE is legislating to decarbonise buildings

The built environment is crucial to the United Arab Emirates' (UAE's) extraordinary and rapid ascent: since its foundation in 1971, the country has constructed the world's tallest building and largest shopping mall. That scale of development has undoubtedly made the UAE the success it is today – but has come at a cost. The World Economic Forum estimates that 40% of global carbon emissions come from buildings and infrastructure, and the lion's share of these come from ongoing building operation. The energy consumption of buildings in the UAE is among the highest in the world, with modern living in the Arabian Peninsula necessitating 24-hour air conditioning in malls, homes and offices.

The parties' perspective: a closer look at the updated UAE Federal Arbitration Law

The recent changes to the UAE Federal Arbitration Regime (set out in Federal Decree 15 of 2023 ("the Amendment")) have been rightly welcomed by the arbitration community, especially in relation to the regulation of arbitrators' conduct and recognition of the increased use and worth of technology platforms. These proactive amendments to a still relatively new law do indeed represent a robust approach to keeping up to date with fast-evolving practice, and a strong statement of intent as regards the UAE's continuing ambition to be a leading hub for dispute resolution. There has been much excellent and thought-provoking commentary on the content of the Amendment from practitioners and others in the arbitration community. So, for a slightly different take, we thought it might be interesting to look at the whole landscape from the perspective of the parties, and/or their transactional advisors, at the front-...
